PROJECTS

Customer Churn Prediction | *Python, Pandas, Scikit-learn, Machine Learning*

- Developed a machine learning model to predict customer churn using customer behavior and transaction data.
- Performed data preprocessing, feature engineering, and trained Logistic Regression and Random Forest models.
- Evaluated model performance using Accuracy, Precision, Recall, and F1-Score metrics.

Movie Recommendation System | *Python, Pandas, Scikit-learn, Recommendation Systems*

- Built a content-based recommendation system using movie metadata and user preferences.
- Applied feature extraction and cosine similarity to generate personalized movie recommendations.
- Improved recommendation relevance through data preprocessing and similarity-based ranking.
